```
<?php
trait TraitSatu {
    public function MethodTrait () {
trait TraitDua {
    public function MethodTrait () {
trait TraitTiga {
    public function MethodTrait () {
        return "<h3>Saya dari trait 3</h3>";
class TraitUser {
    use TraitSatu, TraitDua, TraitTiga {
        TraitSatu::MethodTrait insteadof TraitDua, TraitTiga;
        TraitTiga::MethodTrait as AliasTiga;
        TraitDua::MethodTrait as AliasDua;
$contoh = new TraitUser();
echo $contoh->MethodTrait();
echo $contoh->AliasDua();
echo $contoh->AliasTiga();
```
